

Dräger PSS® Dive EN Diving Equipment

The PSS® Dive is a professional diving apparatus with integrated pockets for weights, easy to configure for 1 or 2 cylinders, with demand valve or full-face mask.

Benefits

Maximum flexibility for customers

The PSS Dive EN has integrated pockets for weights and is suitable for 1 or 2 cylinders, is easy to configure and provides the customer with extraordinary flexibility. Due to the diving cylinder design with valves pointing upwards, the device can be rested securely on the cylinder feet.

Quick and easy to get ready for use

The advanced equipment technology ensures that only minimal maintenance is required. The full-face mask can be connected securely, easily and quickly and is therefore ready for use quickly.

Innovation for more safety

The residual pressure warning which is connected to the mask is a major innovation. With the movable piston, the diver can see, hear and feel the residual pressure warning.

Tested quality and safety

In this configuration, the PSS Dive EN has been tested to the EN 250 standard. In addition, Dräger PSS Dive also establishes the tried and tested personal safety system (PSS) under water. Due to the system approach, all components can be coordinated perfectly to support safety.

Accessories

ST-2717-2004

Dräger UT 402

The Dräger UT 402 is an underwater telephone that provides clear communication without interference between divers and surface controller.
