

Dräger SPC 3800 Splash Suit

Chemical protective suits are used whenever and wherever a person's skin has to be protected from the harmful effects of hazardous liquids. If there is a risk that the entire body may come into contact with solid or liquid chemicals, complete coveralls are the only way to ensure full protection.

Dräger face cuff

The soft face cuff offers flexibility in the selection of the full face mask. You can wear the mask over or under the face cuff.

Back opening

The horizontal zipper is protected by a double cover flap on the back. The back opening makes it possible to don the suit quickly and easily.

Gloves

Foil or butyl gloves can be combined with any overgloves.

Arm cuffs

The SPC 3800 in grey has an additional arm cuff to cover the shaft of the overglove.

Elastic rubber band

The rubber band at the hip ensures a comfortable fit.

Optional:

The sock from suit material with integrated antistatic polymer and externally attached sole improves electrostatic conductivity of the chemical protective suit.

Socks with spray edge

made of suit material
You can comfortably wear the boots or safety shoes over the sock. The drip cuffs offer extra protection over the boots. You can choose boot sizes as required.

Benefits

Light and comfortable

The Dräger SPC 3800 (Splash Protective Clothing) is a light and comfortable, liquid-tight protective suit. It is made of Tychem® F material and is designed for disposable use. The donning and doffing procedures are especially easy because of the zippering concept from shoulder to shoulder at the back protected by a double flap which is made of the same Tychem® F material. Furthermore, the zipper does not interfere with the wearer's work and provides perfect protection during the operation and decontamination phase.

You choose

The Dräger SPC 3800 will be available in the colours grey and orange. The grey version is equipped with heat-sealed laminated safety gloves. The orange version has Butyl gloves attached. The feet are protected by flexible socks with cuffs which are also made of the Tychem® F material. Dräger also offers a suit with a modified sock that optimises conductivity.

Flexible use

The handling and wearing comfort is provided by the thin flexible form. Thereby, the face cuff can be alternatively worn on or underneath the double sealing frame of the mask. The Dräger SPC 3800 uses the same face cuff as the Dräger CPS 7800. Due to the separate packaging, the user can very easily identify if a suit has already been used. The one-piece coveralls with liquid-tight heat-sealed seams are optimized for use with full face masks together with a breathing apparatus, powered air purifying respirator or compressed airline equipment.

Reliable protection

These coveralls provide protection against ultra-fine dusts and powders, against many inorganic acids and alkalis as well as a broad spectrum of organic chemicals in liquid form. The Dräger SPC 3800 is CE certificated and classified according to category III as chemical protective suit type 3, 4, 5 and 6. Furthermore, the suit meets all requirements of the SOLAS approval. The main customer groups are within industrial applications and the shipping market. The coveralls are available in six sizes (S, M, L, XL, XXL, XXXL).

System components

D-10572-2011

Dräger FPS®-COM 5000

Because there is no time for misunderstanding in an emergency: The Dräger FPS®-COM 5000 communication unit replaces the proven Dräger FPS®-COM-PLUS. It has been specifically developed for the full-face mask Dräger FPS® 7000 and ensures clear communication through a voice amplifier unit or radio device – even under extreme conditions.

D-59562-2012

Dräger HPS® 7000

The Dräger HPS® 7000 firefighter's helmet is in a class of its own, thanks to its innovative, sporty and dynamic design, ergonomic fit and components which make it a multifunctional system solution. It provides optimum protection during every operation.

D-13077-2010

Dräger Comfort Vest

Increased performance by up to four hours - without the need for elaborate preparation or logistics: when work gets hot, the Dräger Comfort Vest CVP 5220 is always ready to use as it delivers the cooling action itself. This means: no pre-freezing, no dipping into water, no risk due to dangerous circulating air - and no time loss.

D-4266-2010

Dräger PSS® 5000

The Dräger PSS® 5000 SCBA is a high performance breathing apparatus for the professional firefighter. Combining advanced ergonomics with a wide range of configurable options the Dräger PSS® 5000 provides the user with the comfort and versatility to meet the demands of first responders whenever breathing protection is required.

Accessories

Nitrile-P boots

Firefighter´s boots with toecaps, provide excellent protection against penetration, cutting and abrasion. Extra comfortable, in sizes 43 to 50.

Gas-tight gloves

Made from Viton® or Viton®/Butyl, in sizes 9 to 11.

Tricotril Over gloves

Can be worn over protective gloves, if required.

PVC boots

Safety boots made from PVC with steel toecap and steel sole in sizes 43 to 48.

Accessories

ST-6202-2006

Cotton gloves

Optional glove for hygienic wear under chemical protection gloves.

Technical Data

Material properties	Tychem® F
Abrasion resistance	2,000 cycles
Bursting resistance	240 kPa
Resistance to high temperatures	Seams open at +98 °C
Resistance to low temperatures	Flexible down to -73 °C
Flex cracking resistance	> 5,000 cycles < 15,000 cycles
Puncture resistance	24 N
Air permeability	not permeable
Surface resistance (at 25% relative humidity)	4.8 x 10 ⁹ Ω (inside), 1.0 x 10 ¹³ Ω (outside)
Tear resistance (trapezium)	27.6 N in direction of run / 37.1 N in crossways direction
Weight	SPC 3800, orange, approx. 840 g SPC 3800, grey, approx. 660 g
Permeation data	A continuously updated database Dräger VOICE is available to stay informed about chemical resistances: www.draeger.com/voice
